Why I decided to become a donor?

Because I know that many couples dream of children, but they have difficulties and often society begins to put pressure on them asking "when do they finally have children" In my opinion, parenthood is a really important and responsible step that should be made by loving persons only. I really want as many people as possible to know that they can become the happiest parents, and I also have a lot of oocytes, and one day a friend of mine said, "May we one day ask you to become our egg donor, I have 1/3 of one left out of two ovaries," and then I realized that their problem is not a myth and people are afraid that they will not find their donor. I want to make sure that there are as many different donors with different personality types as possible.
